## **DETAILED ACTION**

### Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a method of making an herbal drug with hypoglycemic activity, classified in class 424, subclass 725 or 773, for example.
- II. Claim 2, drawn to a method of making an herbal drug with hyperglycemic and hypoglycemic activity, classified in class 424, subclass 725 or 773, for example.
- III. Claims 3-4, drawn to a method of identifying a compound in a plant, classified in class 424, subclass 725 or 773, for example.

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, invention I is a method of making an herbal drug composition using *Flemingia macrophylla* and invention II is a method of making an herbal drug composition using *Careya arborea* and invention III is a method for identifying a specific compound in a plant.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
